Amelia Nguyen

Mobile Engineer

Melbourne, Australia · amelia.nguyen@example.com

SUMMARY

Mobile engineer with five years in React Native and some native iOS. Strongest on accessibility and GraphQL data layers. Swift is a growing skill: two small native modules shipped and a SwiftUI prototype built.

EXPERIENCE

Mobile Engineer, Harbourlight Fitness 2023 – present · Melbourne

Workout and coaching app

- Led accessibility across the React Native app, with VoiceOver, TalkBack and Dynamic Type support on every core screen.
- Fixed 90 accessibility issues from a manual audit and added automated accessibility checks to CI.
- Built the app's data layer with GraphQL and Apollo Client.
- Wrote two small native iOS modules in Swift for workout tracking, bridged into React Native.
- Built a SwiftUI settings screen as a hackathon prototype; it has not shipped.

Junior Mobile Developer, a retail startup 2021 – 2023 · Melbourne

Online shopping app

- Built React Native screens for browsing, cart and checkout.
- Fixed Objective-C bridging bugs and maintained REST integrations.
