Grace Turner

Senior iOS Engineer

London, UK · grace.turner@example.com

SUMMARY

Senior iOS engineer with nine years in mobile and Swift in production since 2019. Led a 400k-user app to SwiftUI, cut cold start by 38% with Instruments, and runs accessibility audits every quarter. Comfortable owning a feature from design review to App Store release, and mentoring the engineers around her.

EXPERIENCE

Lead iOS Engineer, Kestrel Health 2021 – present · London

Health and wellbeing app with 400,000 users

- Led the move of a 400k-user app to SwiftUI, shipping it screen by screen with no big-bang release.
- Built the app's SwiftUI design system: 40 reusable components with previews and snapshot tests.
- Profiled launch time with Instruments (Time Profiler, App Launch) and cut cold start by 38% by deferring non-essential work.
- Used the Allocations and Leaks instruments to fix a memory growth issue in the photo upload flow.
- Runs quarterly accessibility audits with VoiceOver and Dynamic Type; fixed 120 issues in the last year.
- Mentors four engineers and sets the code review standards for the iOS team.

iOS Engineer, Parcel Pigeon 2019 – 2021 · London

Courier and delivery startup

- Built the offline sync layer in Swift, with Core Data, background tasks and conflict resolution.
- Shipped a GraphQL client with Apollo for the courier app, replacing 30 REST calls.
- Wrote the XCTest suites that took unit test coverage from 20% to 70%.

Junior iOS Developer, Brightwell Digital 2017 – 2019 · London

Digital agency

- Built client apps in Objective-C and UIKit for retail and media brands.

SKILLS

Languages	Swift, Objective-C
Frameworks	SwiftUI, UIKit, Combine, Core Data, XCTest
Performance	Instruments (Time Profiler, Allocations, Leaks), MetricKit
Accessibility	VoiceOver, Dynamic Type, Accessibility Inspector
Data and tools	GraphQL (Apollo), REST, Fastlane, Git

EDUCATION

BSc Computer Science, a university in London 2014 – 2017
