Kenji Tanaka

iOS Developer

Tokyo, Japan · kenji.tanaka@example.com

SUMMARY

iOS developer with eight years of Swift in production, building a commuter app used daily across Tokyo. Ships SwiftUI screens and GraphQL features in a live app. Looking to go deeper on performance tuning and accessibility in a senior role.

EXPERIENCE

iOS Developer, Mirai Commute 2021 – present · Tokyo

Train and bus journey planner for commuters

- Shipped the SwiftUI timetable and route-planner screens in the live app.
- Integrated a GraphQL client with Apollo iOS and moved route search off REST.
- Improved scrolling in the home feed by prefetching and caching images.
- Added Dynamic Type support to the settings and onboarding screens.
- Wrote XCTest unit tests for the fare calculation module and set up Fastlane releases.

iOS Developer, Kumo Studio 2018 – 2021 · Tokyo

Mobile app agency

- Built and shipped Swift apps for retail and event clients, working in UIKit with Core Data.
- Connected apps to REST backends and handled App Store submissions for ten client apps.
- Fixed crashes reported through the crash dashboard and kept crash-free sessions above 99%.

SKILLS

Languages	Swift, some Objective-C
Frameworks	SwiftUI, UIKit, Combine, Core Data, XCTest
Data and tools	GraphQL (Apollo iOS), REST, Fastlane, Git
Spoken	Japanese (native), English (professional)

EDUCATION

BEng Information Engineering, a university in Tokyo 2014 – 2018
